EDUCATION

Chandigarh University <i>BE in Computer Science and Engineering</i>	Mohali, Punjab 2019 – 2023
Government Model Senior Secondary School <i>Intermediate (CBSE)</i>	Chandigarh 2017– 2019
Doon International School <i>Matriculation (CBSE)</i>	Mohali, Punjab 2015– 2016

EXPERIENCE

Website Development Trainee <i>CS Infotech</i>	January 2024 – Present Chandigarh
- Developed web applications using ASP.NET, leveraging its powerful features and libraries for server-side development. - Participated in various projects encompassing front-end and back-end development, database management. - Collaborated effectively with peers and mentors, actively engaging in code reviews, discussions, and problem-solving sessions to enhance learning and project outcomes.	
Artificial Intelligence Research Assistant <i>Chandigarh University</i>	January 2023 – Present Mohali, Punjab
- Research on Sentiment Analysis on data by different regression techniques for accuracy, Collected and pre-processed a diverse dataset of customer reviews, arranged to the lables. stop word removal, and text cleaning techniques - Documented the project comprehensively, including data sources, pre-processing steps, model architecture, and evaluation results. Wrote an 8-page paper and gave presentation in the university.	

PROJECTS

Fairhood <i>SOLID Principles, ASP.NET Core MVC, Entity Framework</i>	January 2024 – Present
- E-commerce web application using ASP.NET MVC. The application serves as a dynamic platform for selling books online. - Applied dependency injection principles to promote loose coupling and facilitate easier testing and future enhancements. - Employed Entity Framework for seamless data access and management, ensuring efficient handling of book inventory, orders, and customer information. - Implemented responsive and intuitive user interfaces using HTML, CSS, and JavaScript. - Integrated payment gateway STRIPE API to enable secure online transactions	
Sentiment Analysis <i>Python, Google collab, Logistic Regression</i>	January 2023 – May 2023
- Collected and pre-processed a diverse dataset of customer reviews, arranged into lables and text cleaning techniques. - Developed and trained a logistic regression model on a training dataset to predict sentiment labels with high accuracy. - Documented the project comprehensively, including data sources, pre-processing steps, model architecture, hyperparameters, and evaluation results with accuracy.	

TECHNICAL SKILLS

Languages:C++, HTML/CSS, MS SQL, OOPs
Frameworks: Asp.net, Asp.Net Core MVC,
Developer Tools: VS Code, Visual Studio
